Executive Summary

Researcher focused on **LLM agents**, with particular interest in **autonomy**, practical **application**, and **safety/security** in high-stakes domains. I aim to understand how autonomous agentic systems behave under real-world constraints, how they fail, and how they can be evaluated and aligned for safe, reliable use. My work emphasizes building rigorous yet practical methods that connect frontier AI research with applied security, trustworthy system design, and domain-specific risk assessment. My research and engineering capabilities are reflected in a strong track record of top-tier publications, and industry R&D experience, I thinking like a researcher while shipping like an engineer.

Education Background

- **Duke University** *2024* $\xrightarrow{2y}$ *2026*
  Master of Science, Medical Physics (By Thesis, Computer Science Track, Kunshan Campus) GPA: 3.58/4
- **North China University of Technology** *2020* $\xrightarrow{4y}$ *2024*
  Bachelor of Engineering, Information Security GPA: 3.89/4

Industry Experience

- **Molar Intelligence** *2026/06* $\xrightarrow{TBD}$ *Present*
  Algorithm Research Engineer Hangzhou, China
  – Led frontier evaluations of agentic AI system, developing novel open-ended questions to probe emerging capabilities, limitations, and unanswered research challenges.
- **ByteDance** *2025/11* $\xrightarrow{7m}$ *2026/05*
  Research Intern, Agent $\xrightarrow{FTE}$ ~~*Evaluation Expert, Agent*~~ *(refused)* Beijing, China
  – Developed a theoretical framework for agent trajectory evaluation and alignment, established annotation guidelines, constructed a trajectory-level failure attribution dataset, and designed evaluation algorithms for diagnosing agent trajectory failures, supporting post-training data generation for agent RL.
- **TOPSEC** *2024/03* $\xrightarrow{7m}$ *2024/09*
  Security Research Intern $\xrightarrow{FTE}$ ~~*Security Researcher*~~ *(refused)* Beijing, China
  – Built an end-to-end adversarial robustness evaluation prototype that turned scattered attack scripts into a systematic model stress-testing pipeline: generated perturbations under configurable threat models, executed batch robustness tests across ML classifiers, analyzed accuracy degradation and failure patterns under adversarial inputs, and surfaced model vulnerabilities through quantitative robustness metrics and reproducible evaluation reports.
- **NSFOCUS** *2023/09* $\xrightarrow{7m}$ *2024/03*
  Security Research Intern Beijing, China
  – Built the security intelligence loop behind NSFOCUS LLM Security Assessment System (LSAS): translated trustworthy-AI research and Gartner threat reports into a structured LLM risk taxonomy, designed adversarial evaluation algorithms and prototype workflows, and validated them through offensive testing on public and private LLMs, ultimately shaping the system into a Red-Teaming-as-a-Service platform for scalable LLM vulnerability assessment.

Academic Experience

- **Max-Planck Institute for Intelligent Systems** *2026/07* $\xrightarrow{6m}$ *2026/12*
  Research Associate · Dr. Sahar Abdelnabi Tübingen, Germany
  – Incoming researcher focused on agent security.
- **Johns Hopkins University** *2025/05* $\xrightarrow{1y}$ *Present*
  Research Intern · Prof. Chaowei Xiao, Prof. Neil Zhenqiang Gong (Duke) Remote
  – Led the design and development of A2ASecBench, a protocol-aware security benchmark for evaluating vulnerability, attack resilience, and trust boundaries in agent-to-agent multi-agent systems; accepted to ICLR 2026.
- **Zhejiang University - University of Illinois Urbana-Champaign Institute** *2024/08* $\xrightarrow{4m}$ *2024/12*
  Research Intern · Prof. Qiang Zhang, Prof. Huajun Chen Remote
  – Led the development of SciSafeEval, a comprehensive benchmark for evaluating LLM safety alignment in scientific workflows, targeting domain-specific risk behaviors, unsafe reasoning, and task-level compliance; accepted to the AAAI-25 AI4CS Workshop and cited in AI safety reports by Concordia AI[1, 2] and Shanghai AI Lab[3].

Honors and Awards

- **Evaluation and Model Insight Award** EACL *2026*
- **Bronze Tier Reviewer Distinction** IJCAI-ECAI *2026*
- **Black Hat Asia Scholarship** Black Hat *2026*
- **AISST Technical Fellowship** Harvard AI Safety Student Team *2026*
- **BlueDot Technical AI Safety Fellowship** BlueDot Impact *2026*
- **Tinker Research Grant** Thinking Machines Lab *2025*
- **Outstanding Thesis Award** Undergrad *2024*
- **Outstanding Student Scholarship** Undergrad *2023*

Professional Services

- **Journal Referee:** ACM TIST, IEEE TAI, IEEE TBME, IEEE JBHI, IJHCI, ESWA, EAAI, RESS, Computer Networks, Pattern Recognition Letters, Pattern Recognition
- **Program Committee Member:** ICLR, NeurIPS, AAAI, ACL ARR, IJCAI, COLING, IJCNN, ISBI, CHIL, LLMSEC@ACL

Invited Talks

- From Language Models to Autonomous Agent Systems: An Introduction (20 mins). *MedPhy 751K, Duke Kunshan University*, Apr 2026, Jiangsu, China.
- Toward Trustworthy Generative Foundation Models and Autonomous Agent System (25 mins). *Institute of Software, Chinese Academy of Sciences*, Aug 2025, Beijing, China.

Community Engagement

- **2077AI Open Source Foundation** *2026/06* $\xrightarrow{TBD}$ *Present*
  Core Contributor 2077ai.com
- **NVIDIA/garak** *2023/09* $\xrightarrow{7m}$ *2024/03*
  Contributor · Prof. Leon Derczynski, Dr. Erick Galinkin garak.ai
  – Extended the toolkit from text-only red-teaming to multimodal any-to-any assessment with #587: implemented a FigStep-based image+text-to-text jailbreaking pipeline for LLaVA. Improved system reliability through bug fixes #296, #401, and enhanced exception handling #566 across core modules.

Undergrad Competitions (Selected)

- **Cybersecurity & AI Safety:**

2024/08	Second Prize	17th CISCN Security Project Competition	*Leader*
2024/07	Top 5/89	Galaxy Generative AI Safety Competition – Attack Track	*Leader*

- **Mathematical Modeling:**

2024/02	S Prize	2024 Mathematical Contest in Modeling	*Leader*
2023/04	First Prize	13th MathorCup Mathematical Modeling Challenge	*Leader*

- **Programming & Algorithms:**

2023/04	First Prize	14th Lanqiao Software Development and Algorithm Competition	*Individual*
2021/04	First Prize	12th Lanqiao Software Development and Algorithm Competition	*Individual*

- **Digital Media:**

2023/11	Second Prize	11th Digital Media Technology and Creativity Contest	*Leader*
